

Cut with **precision**  
work with **ease**

**SHAPE CENTRAL** The ultimate paradise for every film freaks.

## Save 30% material, Save 50% time!

Are you a professional in PPF, window films, car wraps, or other types of films? Then Shape Central will make your workday significantly easier. Our advanced cutting software allows you to quickly and accurately cut out shapes for vehicles and other parts. No more hassle with manual cutting – let Shape Central do the heavy lifting for you!

### Why Cutting Software is Better Than Bulk

Cutting software not only allows you to easily apply pre-cut patterns, especially for tricky parts like bumpers and side panels, but it also saves you up to 30% on film usage. With bulk cutting, you always use more material than necessary, resulting in extra waste. Thanks to Shape Central, you can work more efficiently and minimize waste.

### Cut what you want

Shape Central offers over 400,000 digitized 1:1 scale patterns of a wide variety of objects. Simply search, select, and start cutting with precision.

### This is what Shape Central has to offer:

- Car body parts (US, EU, and Asia)
- Car interior
- Car windows
- Motorcycles
- Mobile devices
- Panoramic roofs
- Logos of famous brands
- Helmet designs
- Car keys

#### CUT WHAT YOU WANT

SHAPE CENTRAL CONTAINS OVER  
**400,000**  
PATTERNS

FIND IT - SELECT IT - CUT IT

#### DO WHAT YOU WANT

SELECT A PART, DRAG IT ONTO  
THE CUTTING AREA, PRESS 'CUT,'  
AND YOU'RE READY TO GO.

ADJUST, RESIZE, OR ADD DETAILS AS NEEDED.

SELECT IT - DRAG IT - CUT IT

#### IMPORT WHAT YOU WANT

WOULD YOU LIKE TO USE  
YOUR OWN DESIGN? YOU CAN!  
SAVE YOUR WORK IN .SVG FORMAT  
AND EASILY IMPORT IT

IMPORT - SAVE - SHARE

#### SAVE YOUR PATTERNS

SAVE YOUR ADJUSTED OR NEW  
PATTERN EASILY FOR FUTURE USE  
WITHOUT REDOING IT

SAVE - SHARE - IMPORT

#### SUPER NESTING

THE ADVANCED NESTING FEATURE  
OPTIMIZES PART ARRANGEMENT  
TO MAXIMIZE MATERIAL  
USAGE AND MINIMIZE WASTE.

MINIMAL WASTE - MAXIMUM RESULT

# This and more can all be done in Shape Central

## Super easy to use

No time or desire to master complex software?

No worries. Shape Central is intuitive and straightforward.

All buttons are clearly labeled, and you have everything you need right at your fingertips. We also have simple instructional videos available for you.

## Cut what you want

Shape Central contains over 400,000 digitized patterns of various objects at a 1:1 scale. Search for what you need, select it, and start cutting.

## Do what you want

Simply choose the part you need and drag it to the cutting surface. That's it! Press 'cut,' and you can get started right away. Want to rotate, enlarge, shrink, adjust lines, or draw something yourself? No problem! With Shape Central, you can do it all quickly and easily.

## Import your own patterns

Want to use your own design? You can easily do that. Save your work in .svg format and import it effortlessly into Shape Central.

## Groups and colors

Shape Central makes it even easier by categorizing parts with colors. Left, right, bumper, front, and so on each have their own color. This allows you to instantly see which part belongs where, even with complex nesting tasks. The colors help you organize and position parts in the cutting area.

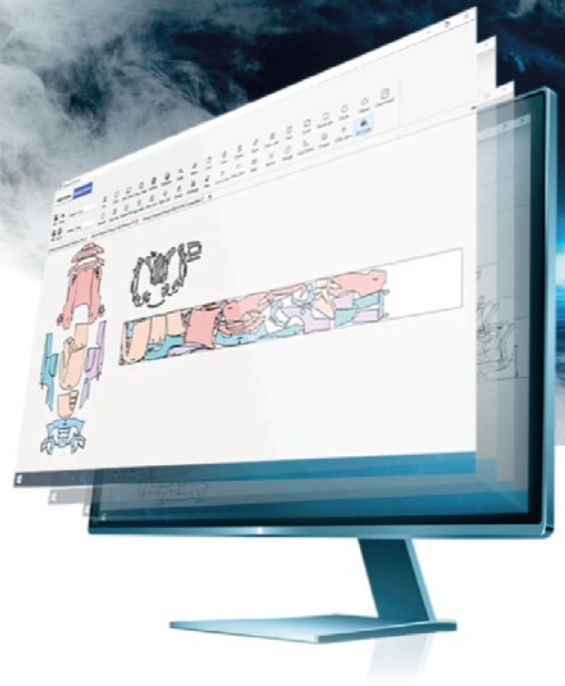

## Pattern sharing

Want to share a pattern with another Shape Central user so they can cut it? No problem at all. With just one click of the 'share' button, you can share the pattern. You remain the administrator of the pattern and can revoke access at any time with a single click. This way, you always maintain control. Convenient!

## System Requirements

Works exclusively on Windows systems

Minimum requirement: Windows 10, 64-bit

## More control over the process

You even have the option to specify your own preferences:

1. Set the distance between the parts in millimeters.
2. Determine whether parts may be rotated fully or only slightly (in degrees). This is especially useful when cutting window film that you still need to shrink later.
3. Work in segments: you can set the maximum plot length yourself. For example, if the total length is 9 meters but you want the plot to be no longer than 3 meters, Shape Central will divide this into three segments of 3 meters.

## Super nesting

Perfect for those who want to save as much film as possible during cutting. With the super nesting feature, Shape Central arranges all the parts as efficiently as possible, leaving minimal empty spaces. Cutting more efficiently than this is nearly impossible!

## Automatic updates

You don't have to do anything to stay up to date. Pattern and software updates are automatically added and installed every week without you noticing.

## No complicated drivers needed

Shape Central automatically recognizes your cutting plotter as soon as it is connected, without the need to install special drivers. The program works optimally with roll plotters.

## Install and go

Installing Shape Central is a breeze. The program runs largely from the cloud. You only need to download the program, log in with the credentials you received from us, and you can get started right away. Please note: Shape Central registers on one PC and cannot be used on multiple computers.

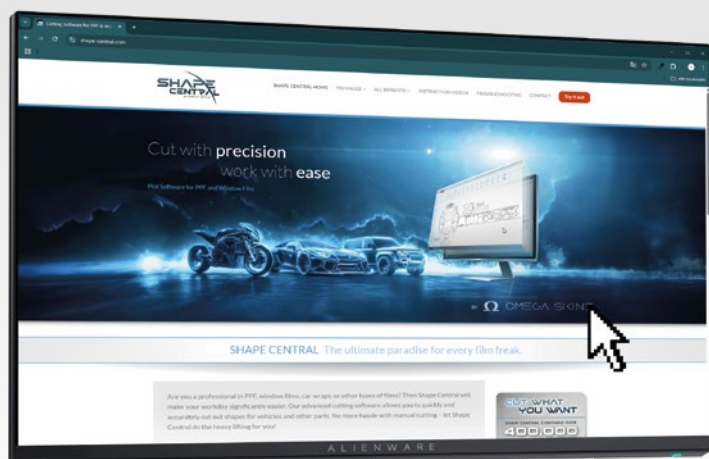

The **package** that suits you.  
Start cutting!

## LONE WOLF

Unlimited access  
to all 400,000 patterns

No cutting codes needed

SHAPE-CENTRAL.COM

- 12-month subscription\*
- No credit cutting codes needed.

With the **LONE WOLF** package, you have unlimited access to digital patterns specifically designed to pre-cut PPF, window films, etc., into the desired shape you choose. You also don't need credit cutting codes, so you are free to use any film you wish.

Search, select, adjust, and cut away. No more hassle with cutting on car paint or glass.

### Included in the package

- Full body car body parts (US, EU, and Asia)
- Car interiors (dashboards, etc.)
- Car windows
- Engines
- Mobile devices
- Panoramic roofs
- Logos of well-known brands
- Helmets
- Car keys

#### \* EXTRA EXPLANATION

A **subscription** is concluded for 12 months and runs per calendar year. If a first subscription is concluded during the year, the remaining months of that year are calculated until December 31. After that, a new year starts with a new annual subscription.

Shape Central offers **maximum** flexibility  
for **saving** film  
and for **efficient** installation.

400.000+ Patterns

Simple software interface, easy to operate

Supernesting feature saves 30% per Roll

Continuously updated patterns and software

Adapts to 99,9% of all PPF Plotter machines

Shape Central is an online cutting program with more than 400,000 patterns, specially designed for accurately cutting PPF films and window films according to the contours of car bodies, car windows, and motorcycle parts. But that's not all: the Shape Central library also includes patterns for helmets, logos, and electronic devices. Choose Shape Central and make your work easier.
