

More than products

This is partnership.

As the creator of the Omega Universe, we understand that experience, coaching and support are essential for lasting success. That's why we equip our dealers with a full arsenal – so every partner can confidently and effectively promote the Omega-Skinz brand in their own region.

Dealer Trainings – Product Knowledge, Market Insight & Sales Skills

Success starts with knowledge. Not just about the products, but also about the market, the customer, and how to sell the story. That's why we regularly host dealer trainings at Omega-Skinz HQ – designed for both dealers and their sales teams.

Application Trainings & Clinics

Across the globe, we're seeing a new generation of wrappers and installers who've taught themselves the craft. But are those techniques up to standard? Our trainings guarantee hands-on confidence and proper techniques with Omega-Skinz products. These trainings and clinics are open to all installers and are hosted frequently at our headquarters.

Support & Marketing Assistance

To truly convey the Omega-Skinz experience, we offer one of the most complete support and marketing kits in the industry. Think: high-end photography, banners, displays, web visuals, posters, trade show assets, colour charts, and much more. Everything you need to present Omega-Skinz with power – we've already got it waiting for you.

Merchandise

The Omega-Skinz universe oozes an epic vibe – think blockbuster meets industrial streetstyle. Users want to connect with the brand they use – and rightly so. That's why we developed a full line of merchandise. Each item is designed to amplify the lifestyle behind Omega-Skinz.

Precision Cutting Software

Our custom software includes over 400,000 digital patterns for car body panels, windows, and other vehicle parts. This allows users to pre-cut films for a perfect fit – saving time and up to 25% on material usage. Yes, our dealers can also offer this software to their own customers.

Omega-Skinz Tools

The right tools make all the difference. Yet we still see too many installers working with gear that just isn't made for premium results. That's why we've curated a range of professional tools – from the perfect squeegee to the ultimate cleaner. Everything you need for a flawless install.

More than film

This is a movement.

Omega-Skinz is the fastest-growing and most eye-catching brand in the automotive world. Born from a long-term collaboration between two industry leaders – SOTT Automotive and UPM Grafityp – Omega-Skinz is shaking up the scene.

What makes Omega-Skinz different from all the others? Simple. It's all about a unique colour range, premium quality, deep product knowledge – and let's not forget the standout styling, bold marketing approach, and unforgettable events we regularly host.

The best of both worlds

SOTT Automotive takes care of everything technical, creative and marketing-related. They sparked the idea to launch a new brand and are behind every concept, every name, the visual identity and the game plan.

UPM Grafityp handles production, ensuring top-tier quality and consistency at every step. The result? A flawless collaboration – bringing together the best of both worlds.

Wrapping Film
PPF Film
Window Film
and more...

Omega-Skinz wrapping film stands out thanks to its unmatched colour nuances. Each colour is carefully developed to give a vehicle that exact look and feel that transforms it into something with true character and presence.

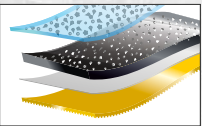

Turn Colour into Character

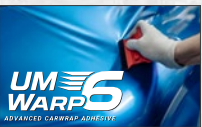

The metallic shades in the Omega-Skinz range have an exceptional depth – almost indistinguishable from real automotive paint. Exactly how wrap film should be.

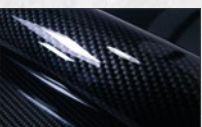

Our matte finishes feature a unique top layer that enhances depth and definition, making bodylines and contours pop like never before.

Omega-Skinz is a cast film, built up in multiple layers. This creates deeper, more vibrant colours than standard wrapping films.

The special UM-Warp6 adhesive with invisible air channels ensures ultra-fast installation – and endless repositioning, without tearing or overstretching the film.

Omega-Skinz knows what ‘specialty’ really means. That’s why the range includes no fewer than 7 unique finishes – from carbon classic and forged to black metal. Each one a standout in its own right.

THIS IS OUR WRAPPING FILM:

OMEGA SKINZ

- More than colour – this is personality in a wrap.
- Every colour with a purpose – no shade without intent.
- Contours that speak. Bodylines that dominate.
- Easy to handle. A masterpiece once applied.
- UM-Warp6 adhesive. You feel the difference during install.
- No visible air channels. Just pure perfection.

These days, the market is flooded with PPF films. But what actually makes one stand out? Omega-Skinz has the answer.

Protection Without Compromise

Fear is for the Unprotected

Sure, they all protect. That’s a fact. But Omega Shield does so much more.

Our roots in paint protection go all the way back to 1987 – that’s not hype, that’s pure experience.

We’ve witnessed every chapter of the PPF evolution, and with that legacy we proudly introduce: Omega Shield – the holy grail of protective films.

This film handles so smoothly it’ll make installers smile. No glue lines. No distortion from stretching.

The top layer repels dirt and even lets minor scratches vanish on their own – like they were never there.

Available in both Gloss and Satin – whatever suits your style.

THIS IS OUR PAINT PROTECTION FILM:

OMEGA SHIELD PROTECTION

- Not new to the game. Just ruling it.
- Since ‘87. No hype – just hardcore knowhow.
- Omega Shield: the holy grail of paint protection.
- No glue lines. No stress. No BS.
- Reposition like a boss. No drama.
- Gloss or Satin – whatever works for your vibe.

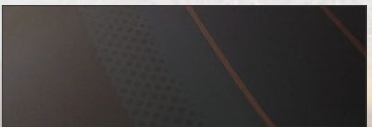

With over 39 years of experience in solar window films, we’ve built a range tailored for the professional high-end automotive industry.

stay Cool stay Hidden stay Slick Where comfort meets class

A driver faces many enemies. And the SunRage series from Omega-Skinz is their best defence.

Our window films block those scorching sunrays, keep prying eyes out – so valuables stay hidden – and give passengers the privacy they deserve.

Perfect application over the dot-matrix? No problem with SunRage. Every window tint on the planet knows the struggle with those dotted raster areas. The big question: will the film sit cleanly over it? SunRage films do.

Window films need to shape quickly to curved glass. Time is money. That’s why SunRage comes equipped with Mach-3 heatshrink technology – allowing fast, smooth shrinking with minimal effort.

Our experience has taught us that every country has its own demands and preferences. That’s why the SunRage range includes a wide variety of film types: nano-ceramic, hybrid, carbon, metalized, and deep dye.

And yes – we carry the official approvals and licenses, including Germany’s ABG certification.

THIS IS OUR SOLAR WINDOW FILM:

SUNRAGE AUTOMOTIVE WINDOWFILM

- Blocks sunlight and curious eyes alike.
- No view inside, full-on style outside.
- For those who want comfort, safety and looks – all in one.
- Dot-matrix proof. No excuses, just a flawless finish.
- Stress-free shrinking – thanks to Mach-3 tech.
- From nano-ceramic to deep dye. Always the perfect fit.
